LIST 2507

ROSES

1925-1926

BUDDED AND OWN ROOTS

This list offers the most complete line of both in the United States.

FACILITIES. My connections are unexcelled. In budded roses I market the entire output of three important growers. In own root roses I represent the largest grower in the country.

NOVELTIES. This list embraces the most up-to-date offerings in the country. I am now able to supply budded stock of many European Novelties simultaneously with their introduction abroad.

ABBREVIATIONS. The classes, H. T., H. P., etc., are too well known to need explanation. N. R. S. means National Rose Society of England. A. R. A. followed by figures refers to volume and page of American Rose Annual for further details. This is issued by American Rose Society to which everyone interested in roses should belong.

QUALITY. Everything offered is field grown and California grown. Eastern Nurserymen who have visited California know that our Hybrid Teas and Pernetianas are absolutely unequalled. The vigor is such that budded stock is now full grown and will need no further irrigation.

TIME OF SHIPMENT. Budded roses are all grown in Northern California. Growth is completed by June. They are ripened slowly during summer and can be dug and shipped beginning about November 1st. Own root roses are produced in Southern California. They grow all summer, are dug in December, and shipped beginning about Jan. 1st. Both can be shipped throughout the winter as we have no freezing weather. They will not stay dormant much after Feb. 15th, and for good results shipments should be made by that date or else packed and put in cold storage for spring shipment.

QUANTITIES. All prices are "flat" regardless of quantity.

Budded. Novelties listed at \$1.25 or higher may be ordered singly if desired. Varieties at 75c or less, not less than 5 of a kind.

Own Root. All varieties must be ordered in multiples of 10.

PACKING. On budded stock packing is charged for at cost of material. Own root roses are packed without extra charge.

TERMS. To buyers of known or established credit, 60 days net from date of shipment. Otherwise cash with order or 25% with order, balance C. O. D.

SHIPMENT. State explicitly whether you wish freight or express. In either case all shipments are carried at buyer's risk. Delay or damage in transit is up to transportation companies. Express is recommended for all Eastern shipments.

WHICH KIND? Be sure to show clearly whether you want budded or own root stock. This is important.

WHOLESALE ONLY. This list is for those who are legitimately in the trade and for no one else. Orders from anyone not in the trade will positively not be accepted.

BUDDED ROSES

Please read preliminary matter carefully.

Prices specified are for No. 1 grade. Second grade is not usually sold in advance but can be booked if desired at about one-third less on varieties listed at 75c or lower.

Budded roses are grown two years in the field (no "June buds") so of course are larger and heavier than own root stock.

ROOTS. The great majority are budded on Manetti. Other stocks used are La Griferaie, Ragged Robin and Odorata.

CLIMBERS are grouped by themselves as a matter of convenience.

BUSH VARIETIES

Alex Dickson & Sons' Set of 1925 Novelties

Although I have delayed this list ten days beyond usual time, word has not yet been received from Ireland as to what varieties will make up this year's list of novelties. This will be sent out later as a separate list. If you do not get a copy and are interested, please write for it.
